Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Applicant's election with traverse of Group I, claims 1-8, in the reply filed on 7/8/05 is acknowledged. The traversal is on the ground(s) that the two inventions are not distinct and because the subcombination does not have separate utility. This is not found persuasive because of the distinct classes education for the instruction kit, and exercise for the stretching device.

The requirement is still deemed proper and is therefore made FINAL.

Claims 9-12 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 7/18/05.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

of Claims 1-8 are rejected under 35 U.S.C. 102(e) as being anticipated by Bremm.

Bremm disclose a flexible, inelastic strap having a first end and second end (fig. 1), and having a fixed loop formed in the flexible strap at the first end (29), a connector assembly comprising a movable member configured for positioning along the length of the strap (30), and a fixed member that is attached to the second end of the strap (38), wherein the connector has a connected configuration wherein the movable member and the fixed member are releasably connected, thereby forming a second loop in the flexible strap approximate the second end of the strap, and a disconnected configuration wherein the movable member and the fixed member are not connected (fig. 4).

As for claims. 2 further disclose 8 feet to 12 feet (fig. 3), 1.5 inches to 4 inches (fig. 3), 14 inches to 18 inches (fig. 3), a snap buckle (fig. 4).

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Beauchamp, Dixon, and Albanese disclose a strap having a fixed loop on one end, and moveable snap buckle on the other.
